Subject: Sulfolane investigation: North Pole Refinery

Hi Kira,

I just wanted to touch base with you and introduce myself. I recently became the project manager for the North Pole Refinery contaminated site.

EPA has been recently involved with this site through the completion of a preliminary assessment (PA). Brandon Perkins has been the contact for the PA.

Last August the former project manager, Ann Farris, and our program manager, Steve Bainbridge, visited your office and presented to Dan Opalski and other staff the status of the investigation as well as some background.

We have a meeting scheduled for next Tuesday with Rick Albright to update him on the site and answer any questions he and his staff may have. Not knowing if your program overlaps with the Office of Environmental Cleanups, I wanted to let you know in case there is any chance you can attend this meeting. Ann Farris, Steve Bainbridge and I will be presenting the most current summary of the site.

Thank you for serving as a liaison for some much needed expertise. We are looking forward to working with you.

Sincerely,

Tamara
